Completed in 2015, the WHS Urban Farm is a two-acre urban farm built for and managed by Woodlawn High School students.

URBAN FARM:
The 2-acre farm includes a greenhouse, bio-retention pond, office and teaching space, and produce processing and storage facilities.

SCIENCE CLASSES:
Students are challenged by hands-on, place-based, and project-based learning in this space throughout the school day.

FOOD BUSINESS:
Through our co-op, students will work closely with the WHS Urban Farm team to design, launch, and operate a food business.
